SUMMARY

AI Automation Engineer and Computer Science undergraduate specializing in Artificial Intelligence. Expert in developing secure, local-first Python applications, building industrial-grade RAG systems, and designing n8n automation workflows. Proven ability to lead end-to-end technical projects and manage client solutions while maintaining a 3.66 CGPA. Seeking an Industrial Trainee position (Oct 2026) to apply advanced Python, Machine Learning, and Process Automation skills.

EDUCATION

Universiti Teknikal Malaysia Melaka (UTeM)

Bachelor of Computer Science (Artificial Intelligence) with Honours | Mar 2025 – Feb 2027

- CGPA: 3.66 / 4.00
- Core Coursework: Machine Learning, Natural Language Processing, Image Processing and Recognition, Neural Networks, Evolutionary Computing.

Universiti Teknikal Malaysia Melaka (UTeM)

Diploma in Computer Science | Aug 2022 – Feb 2025

- Awards: Dean's Award Recipient, Program Director Recognition Award.

TECHNICAL SKILLS

- Programming: Python, SQL
- AI & Data Science: Retrieval-Augmented Generation (RAG), Machine Learning, Generative AI, Natural Language Processing (NLP), Vector Databases
- Automation & Tools: n8n Workflows, Pandas, Streamlit, PyPDF

PROFESSIONAL EXPERIENCE

Meta AI Sdn Bhd | Malacca, Malaysia

AI Developer / Internship Trainee | July 2024 – Present

- Built AI call center workflows and developed automated n8n pipelines to reduce manual administrative tasks.
- Developed an AI-powered WhatsApp chatbot for JJ Deco Plus Sdn Bhd to improve customer interaction and response times.
- Designed AI influencer systems for social platforms and applied NLP for effective query handling.
- Conducted rigorous testing and debugging to ensure chatbot reliability before deployment.

Xiao Wan Zi Swimming Centre | Melaka, Malaysia

Assistant Swim Coach | June 2025 – Present

- Managed assigned student rosters, taking direct responsibility for teaching and scheduling.
- Applied performance analysis to customize training plans, ensuring consistent technique improvement across clients.

KEY TECHNICAL PROJECTS

- **Smart Recycling Robot (2025):** Developed a hardware-software integrated prototype using LEGO EV3 robotics. Programmed color sensors using Micropython to successfully automate industrial-style waste sorting logic.
- **PDF Fusion Pro Dashboard (Apr 2026):** Built and deployed a secure, local-first Python software application utilizing Streamlit and PyPDF to automate offline document manipulation.
- **UTeM TUAH Chatbot (Dec 2025 – Apr 2026):** Engineered an automated AI chatbot system for university deployment, architecting the server infrastructure and seamlessly integrating the backend database.
